Sampling date: _____ Number of samples: _____ Age: _____ Breed: _____ Species: _____

Material: _____

Signs of disease: _____

Please tick box(es) for test(s) required

PCR examination

- Fowl adenovirus (FAdV)
- Avian encephalomyelitis virus (AE)
- Avian influenza A virus (AI)
- Fowl poxvirus
- Avian leukosis virus subgroup A/B/D (ALV)
- Avian leukosis virus subgroup J (ALV-J)
- Avian nephritis virus (ANV)
- Avian orthoreovirus
- Avian rhinotracheitis virus type A and B (ART/TRT/AmPV)
- Avibacterium paragallinarum (Coryza)
- Campylobacter jejuni/coli (w/o differentiation)
- Chicken anemia virus (CAV)
- Chlamydia spp.
- Egg drop syndrome (EDS, Adeno 127)
- Duck hepatitis virus
- Erysipelas
- Gallibacterium spp.
- Infectious bronchitis virus (IB)
- Infectious bursal disease virus (Gumboro/IBD)
- Infectious laryngotracheitis virus (ILT)
- Marek disease virus (MHV)
- Marek disease virus, vaccine strain "Rispens"
- Mycoplasma gallisepticum (Mg)
- Mycoplasma synoviae (Ms)
- Mycoplasma meleagridis (Mm)
- Newcastle disease virus (NDV)
- Ornithobacterium rhinotracheale
- Pasteurella multocida
- Herpesvirus of turkeys (HVT)
- Reticuloendotheliosis virus (REV)
- Riemerella spp.
- Salmonella spp.

Pathogen typing (PCR)

- Infectious bronchitis virus (IB):
- All serotypes
- Massachusetts
- Italy
- D-274
- 4/91 (793B)
- China QX
- D-1466
- Escherichia coli: Determination of virulence genes (aerA, ColV, irp, tsh)
- Enterococcus spp. typing: (E. faecalis, casseliflavus, faecium, hirae, cecorum)
- Avian Influenza hemagglutinin-typing:
- H5
- H7
- H9
- Clostridium perfringens typing (α -, β -, ϵ -, ι -, β_2 - toxins and cpe enterotoxins)

Pathogen typing (Genome sequencing)

- Avian orthoreovirus
- Fowl adenovirus (species and serotype)
- Infectious bronchitis virus
- Infectious bursal disease virus (differentiation of field and vaccine strains)
- Mycoplasma gallisepticum (differentiation of field and vaccine strains)
- Mycoplasma synoviae (differentiation of field and vaccine strains)
- Newcastle disease virus (incl. cleavage site determination)
- Differentiation of bacteria via 16s-Analysis
